# App Tutorial

In this tutorial I will guide you through the SmartShoppingList App.

Login

When starting the app, you will find yourself in the login screen where you can sign in or switch to the register screen by pressing the text under the login button.

After creating a new account, you will start in the home tab with your first shopping list in the group local which is a single user that can not be altered or deleted. Now you can press the three strokes to open the navigation drawer where you can switch between the tabs.
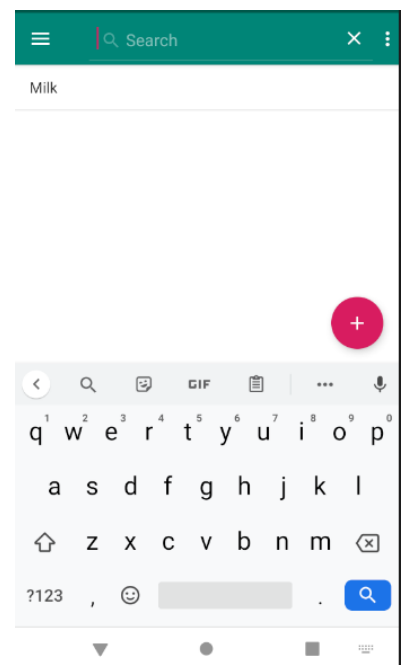

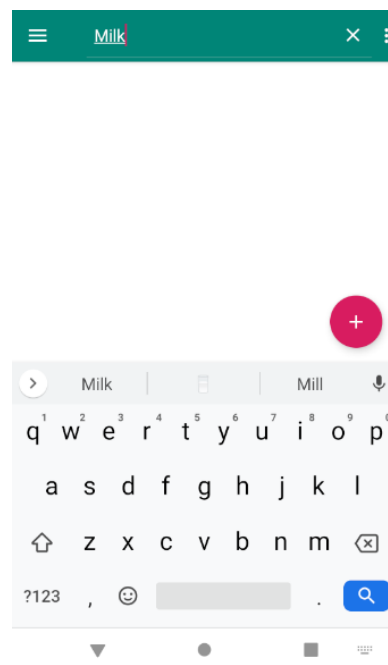

Tabs

Home

The home tab is the tab where your currently selected shopping list is displayed. You can add items by pressing the "+" button in the bottom right corner.

When adding an item, you can either create a new item by typing in the name of the item and pressing "+" or select one of the items you added in the.

If you create a new item, the text you typed in the search bar will be used as name, which still can be altered if you want and you can select which category the item will be assigned to, if no category is selected the item will be assigned to a general category. You also can change the amount and the unit of the item you want to add to your list.

When adding an item via suggestion you only have to select amount and unit.

If you add the same item, with the same unit multiple times, they will be summed up.
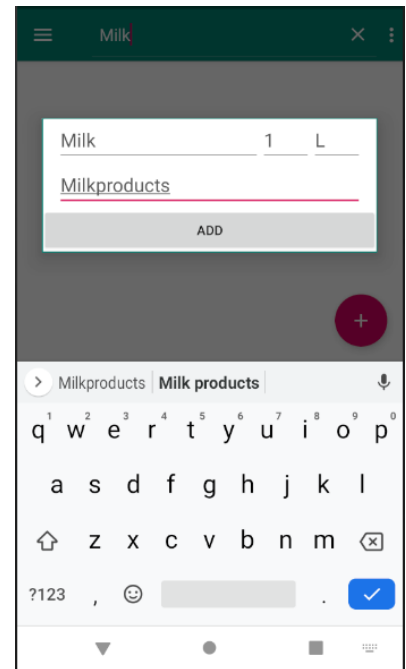

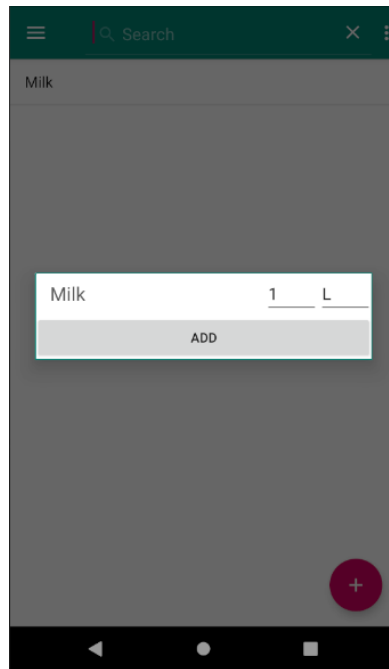

When long pressing an item at the shopping list you can either delete or alter it, the window for altering items is like the one for creating.
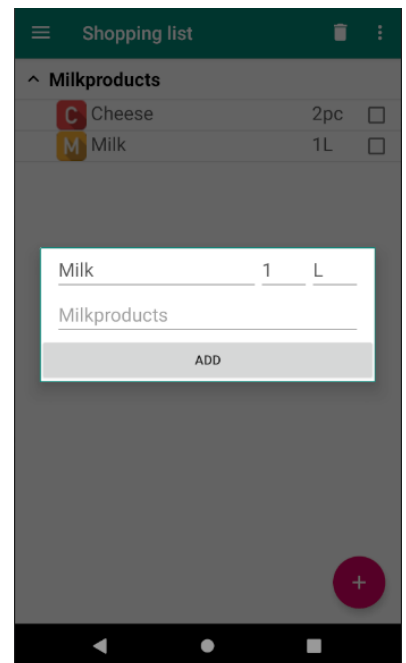

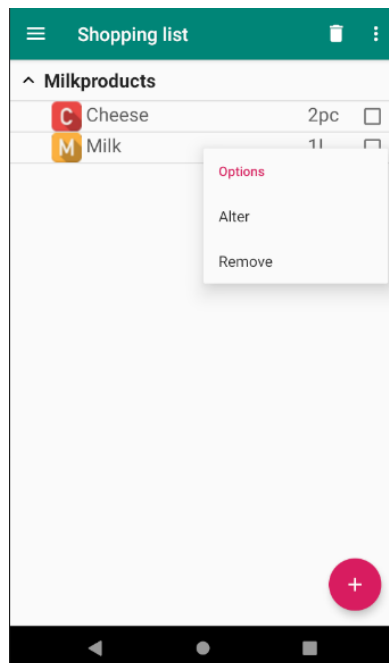

To mark an item as bought you can tick the checkbox and the item is moved to the category bought. By pressing the rubbish bin icon in the top right, you can delete all marked items.
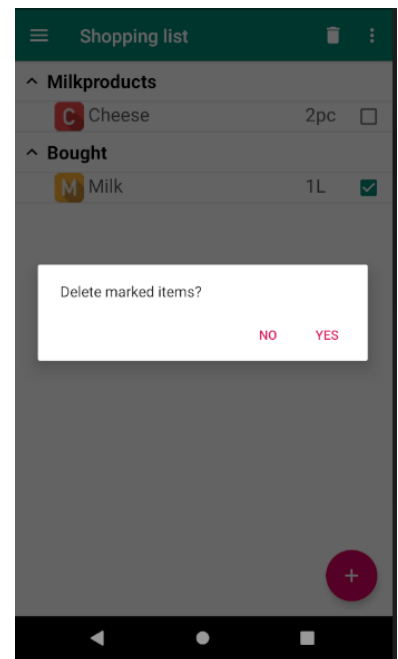

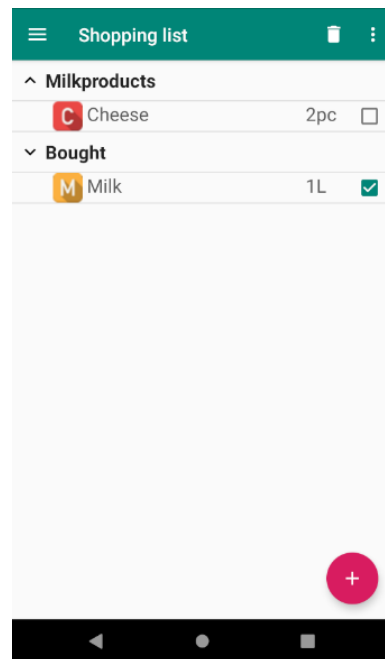

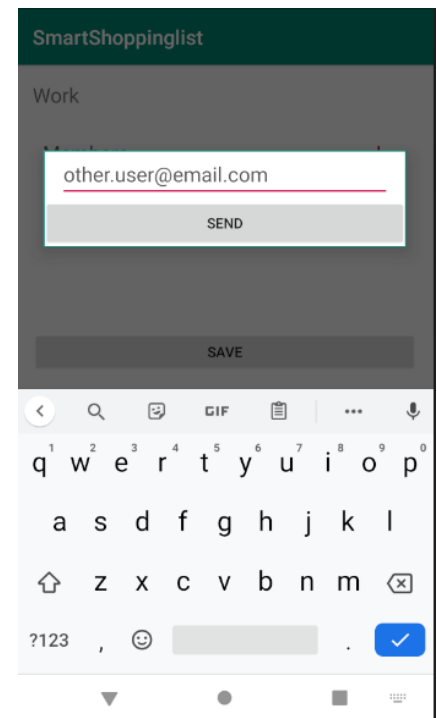

Group

In the group tab you can create and administrate groups, in order to create a new group, you have to press the "+" button and type in the name for the group and to administrate the group you have to long press the name (the local group cannot by administrated).
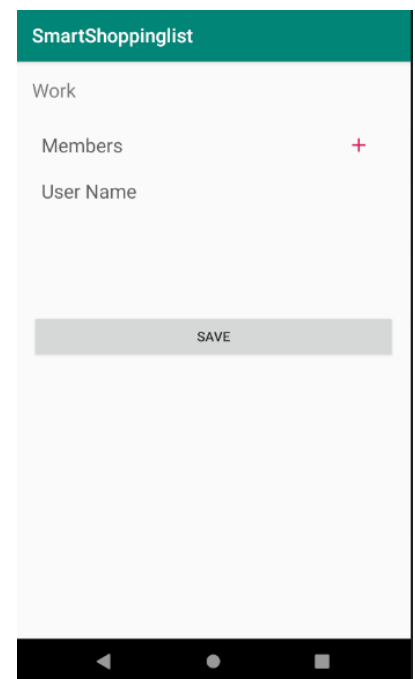

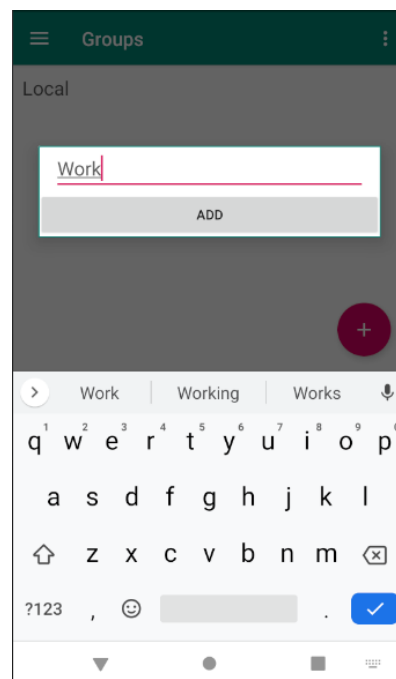

By clicking the "+" icon you can invite other user to your group via their email.
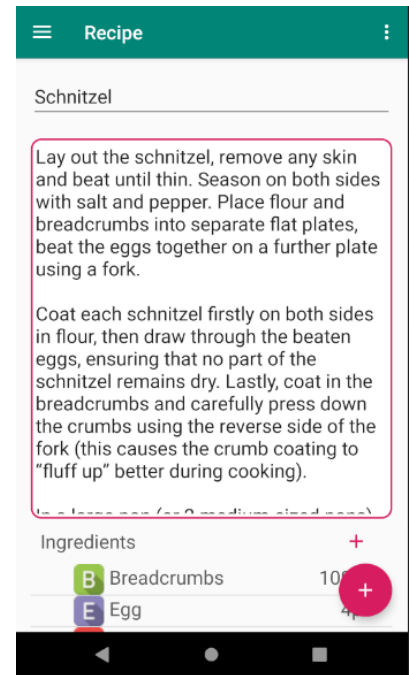

List

In the list tab you can create, alter, remove, and select lists. Lists can be created via the "+" button, when creating a list, you have to type in a name and select a group. Lists also can be removed by long clicking the name. You can select a list by short clicking it and after selecting a list it is displayed in the home tab.
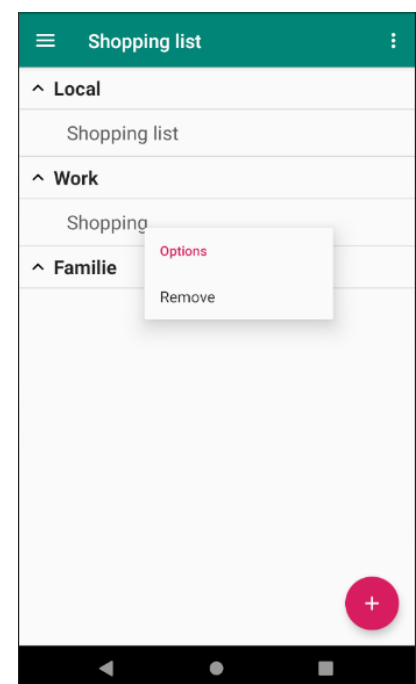

Recipe

When pressing the "+" button in the recipe tab you can create a new recipe.

A recipe has a name, a description and an ingredients list, you can add items to the ingredients list by pressing the "+" icon. And to store the recipe you only have to press the "+" button in the bottom right corner.
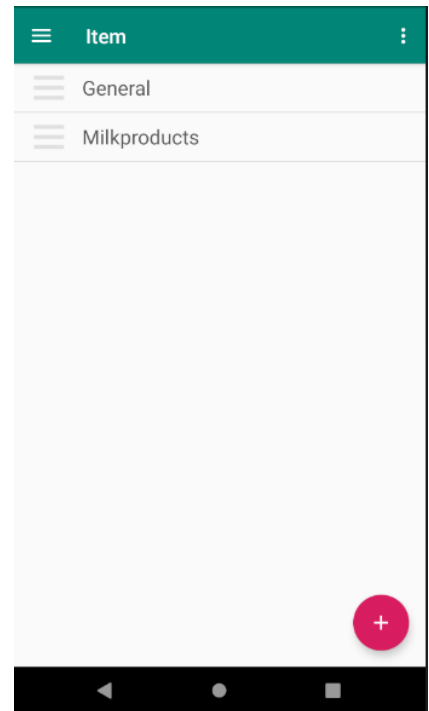

The recipe now appears in the recipe list and by pressing it you can view it. When pressing the "+" button all ticked ingredients are added to a selected list.
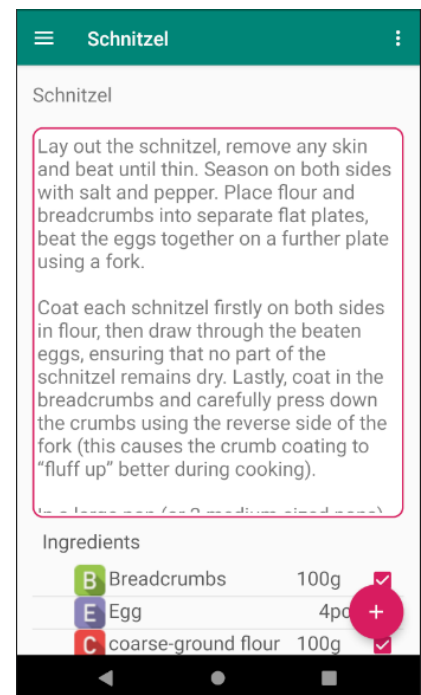

Items

In the Items tab you can change the order in which the categories are displays in your lists by dragging them. By pressing a category, you can view all items of it and by pressing the "+" button you can add new items.

Invitations

In this tab you can see if someone invited you to a group, if you were invited you can either accept or deny the invitation.

Settings and reload

When pressing the 3 dots you can reload manually or open the settings. In the settings tab you can change the language (English, German) or log out. (if you don't log out you are automatically logged in the next time you start the app)
